### **Integrated Report Portal Is Opened**

July 27th, 2022 UPDATE

ZOZO, Inc. (headquartered in Chiba City, Chiba Prefecture, Representative Director, President & CEO: SAWADA Kotaro), which operates the fashion e-commerce ZOZOTOWN, has newly opened an “Integrated Report Portal” on its corporate website today. This integrated portal provides a comprehensive overview of financial and non-financial information for a wide range of stakeholders, including shareholders and investors, to understand ZOZO Group's business management and corporate activities.

In April 2021, we announced our sustainability statement “Fashion Connects and Leads us to a Sustainable Future.” and Key Actions, followed by announcements such as the “2030 Carbon Neutral Declaration” (\*), which aims to reduce greenhouse gas emissions (GHG emissions) from the business activities, to net-zero by FY2030, proceeding towards the realization of a new era of fashion that will improve our environment and society.

The integrated portal publishes messages from SAWADA Kotaro - Representative Director, President & CEO, and YANAGISAWA Koji - Director, Executive Vice President & CFO regarding the importance in both sustainability and corporate growth, and the direction of the company’s future growth, as well as our value creation strategy. In addition, information that has been disclosed to date, such as the materiality map, which have identified materiality that is of great importance to both us and our stakeholders, ESG data, financial highlights, and each activity we promote based on the Sustainability Statement, are now accessible from the portal.

Using this portal as a tool for constructive communications with our stakeholders, we envision a new era of fashion that will improve our environment and society, and continue working towards realizing our corporate philosophy, "Inspire the world. Deliver joy every day."

(\* ) Reduce scope 1 and scope 2 of GHG emissions classified by GHG Protocol to net-zero.

Scope 1: direct emissions from owned or controlled sources of the company (fuel combustion, industry-wide process)

Scope 2: indirect emissions from the electricity, heat and steam generation of purchased energy
